0 (d)				The Other Combination		

(a) Trim numbers correspond to API 600.

(b) Base material equal to or better than the body / bonnet material corrosion resistance.

(c) Type of body seat ring X : Threaded renewable seat ring
 Y : Seal-welded seat ring
 Z : Integral seat

(d) These trim numbers are not included in API 600.

(e) Z type can be used when trim material is equal to that of body.

(f) Z type can be used for Globe and Lift Check valves.
